About the Filters

Your Levoit Desktop Air Purifier uses 2 filters, both of which use a 3-stage air filtration system to purify air.

A. Pre-Filter

- Captures large particles such as dust, lint, fibers, hair, and pet fur.
- Maximizes the life of the Filter by protecting it.

B. Main Filter

- Filters small particles such as fine dust, smoke particles.

C. Activated Carbon Filter

- Physically adsorbs smoke, odors, and fumes.

GETTING STARTED

1. Flip over the air purifier. Twist the cover lock clockwise and lift the filter cover off of the air purifier. **[Figure 1.1]**
2. Take out the filters and remove the filters from their plastic packaging. **[Figure 1.2]**

Figure 1.1

Figure 1.2

GETTING STARTED (CONT.)

- Place the filters back into the air purifier. The Pre-Filter must be facing outward and the Activated Carbon Filter must be facing inward for both filters. Make sure the pull tabs are visible and facing inward. **[Figure 1.3]**
- Replace the filter cover. Twist the cover lock counter-clockwise to secure the cover.
- Place your air purifier on a flat, stable surface with the air outlet facing up. Leave 15 inches / 38 cm of clearance on all sides of the air purifier.
- Connect the AC power adapter to the air purifier. Plug into an outlet.

USING YOUR AIR PURIFIER

WARNING: Make sure the air outlet and the air inlets are not blocked. This may cause the air purifier to overheat and stop working.

- Press the Control Button to turn on the air purifier. The fan will start on "SLEEP".

Note:

- Sleep Mode uses the lowest possible fan speed for a quiet environment.*
- In Sleep Mode, the display lights will automatically turn off after 5 seconds. Press the Control Button again to turn the display lights back on for 5 seconds.*

- Optionally, press the Control Button repeatedly to change fan speed ("SLEEP", "LOW", and "HIGH"), and to turn the air purifier off.

Note:

- "HIGH" is the loudest fan speed, but cleans air the quickest.*
- For best results, or to address a specific air quality issue such as smoke, run the air purifier on "HIGH" for 15–20 minutes before using a lower speed.*
- To effectively clean air, keep windows and doors closed while the air purifier is on.*

 3. Vacuum the inside of the air purifier using a vacuum hose with a crevice attachment. **[Figure 2.1]**

CARE & MAINTENANCE (CONT.)

When Should I Replace the Filters?

You should replace your filters every 6–8 months. You may need to change your filters sooner or later depending on how often you use your air purifier. You may need to replace your filters if you notice:

- Increased noise when the air purifier is on
- Decreased airflow
- Unusual odors
- Visibly clogged filters

Note: To maintain the performance of your air purifier, **only** use official Levoit filters. For more information, contact **Customer Support** (see page 15).

5. Replace the cover. Plug in the air purifier.
6. Reset the Check Filter Indicator light (see **Resetting the Check Filter Indicator Light**, page 10).

If not using the air purifier for an extended period of time, wrap the filters in plastic packaging and store in a dry place to avoid moisture damage.
